WORK EXPERIENCE

System Engineer
Infosys

01/2022 - Present   *Bhubaneshwar*

Unix Commands to Python language

- **Completed the task of translating Unix commands into Python language. Converted complex Unix code into Python code for improved readability and functionality.**

PERSONAL PROJECTS

Flash Card Generator
- **The flashcard generator facilitates the seamless creation of user-defined groups, each capable of accommodating multiple cards. Additionally, the platform offers the convenience of downloading and printing individual cards .**
- link: https://flashcardgenerate.netlify.app/

Book My Show
- **Specifically designed to efficiently store and retrieve data in MongoDB. Prioritizing the backend development, the application ensures seamless data management, allowing for the storage of comprehensive booking details. By utilizing a well-defined API, the application enables smooth data retrieval operations.**
